PROFESSIONAL SUMMARY

Full Stack Developer specializing in the MERN stack and TypeScript, with hands-on experience using AI-assisted development tools to accelerate debugging, testing, and delivery. Experienced in building scalable web applications, optimizing backend performance for high-traffic systems, and deploying containerized solutions. Proven ability to resolve critical production issues and implement secure authentication protocols. Passionate about clean code architecture and efficient database design.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, HTML5, CSS3
Frontend: React.js, Next.js, Redux Toolkit, React Query, Tailwind CSS, Bootstrap, Responsive Design
Backend: Node.js, Express.js, RESTful APIs, WebSockets (Socket.io), Middleware Design, Redis
Databases & DevOps: MongoDB, PostgreSQL, AWS S3, Docker, Git/GitHub
AI-Assisted Dev: Claude Code, GitHub Copilot, Cursor

PROFESSIONAL EXPERIENCE

Full Stack Developer *Jul 2025 – Present*
Promatics Technologies — Ludhiana, India

- Strengthened backend stability of a production application by refactoring legacy code, eliminating critical performance bottlenecks, and establishing error monitoring protocols
- Optimized API response times by identifying and eliminating **N+1 query issues** and implementing efficient database indexing strategies in MongoDB
- Resolved **critical bugs** in the legacy codebase, specifically addressing unhandled promise rejections and race conditions to stabilize the production environment
- Implemented robust **Role-Based Access Control (RBAC)** using JWTs to secure sensitive API endpoints and manage user hierarchies
- Fixed a production **AWS S3** file collision bug by implementing a timestamp-based naming strategy on the backend upload service
- Standardized API responses and error handling middleware; used **AI-assisted coding tools** to speed up debugging and code review cycles

Full Stack Developer Trainee *Jan 2025 – Jun 2025*
ThinkNEXT Technologies Pvt. Ltd. — Mohali, India

- Developed **RESTful APIs** implementing **Joi validation middleware** to ensure data integrity and prevent injection attacks
- Built responsive frontend interfaces using React.js and Redux, ensuring consistent behavior across different browsers and devices
- Deployed full-stack MERN applications to cloud platforms (Render, Vercel) with environment variables and production build configuration.
- Collaborated with the QA team to fix UI/UX inconsistencies and improve application accessibility

KEY PROJECTS

PulseChat - Real-time Messaging App — [Live Demo](#) *React.js, Socket.io, MongoDB*

- Architected a real-time messaging system using **WebSockets (Socket.io)**, handling concurrent connections with robust reconnection logic
- Implemented MongoDB **compound indexing** on Timestamp and ChatID fields, enabling sub-second retrieval of message history for active rooms
- Designed a secure authentication flow using JWTs with automatic token refresh mechanisms

Projectrack - Project Management Platform — [Live Demo](#) *Next.js, PostgreSQL, Prisma, Clerk*

- Engineered a comprehensive task tracking solution featuring team collaboration tools and real-time status updates
- Optimized data retrieval by utilizing Prisma's include and select features to prevent **over-fetching** and minimize API payload size
- Integrated Clerk authentication to manage complex user sessions and role-based permissions securely

ShopSphere - E-Commerce Platform — [Live Demo](#) *React.js, Express.js, MongoDB, Razorpay*

- Built a full-featured e-commerce solution including cart management, order processing, and an admin dashboard
- Integrated **Razorpay payment gateway with webhooks** to securely handle asynchronous payment success/failure events
- Implemented MongoDB aggregation pipelines to generate efficient sales reports and inventory analytics

EDUCATION

Bachelor of Engineering in Computer Engineering *Jun 2021 – Jun 2025*
Guru Nanak Dev Engineering College — Ludhiana, Punjab

Relevant Coursework: Data Structures & Algorithms, Database Management Systems, Software Engineering, Web Technologies
